

Mr. Allison's News

Reading: The class will continue working on a lot of vocabulary and comprehension skills. Please continue to read with them at home nightly. Remember reading only helps them if they are reading it correctly. Work on pausing at commas and stopping at periods.

Social Studies: We are starting a chapter that focuses on landforms, erosion, and natural resources. This is the biggest section of Social Studies for the year. The class will be learning a lot of new terminology and learning how to conserve resources.

Math: We will continue to work on fractions. We have learned several strategies to divide and multiply and will continue to use them daily. Please keep reviewing basic facts at home in order to keep them fresh. These facts will make multiplication and division more automatic. They can answer any fact. Now they need to make them automatic.

Note: Please continue to check your child's planner. Their color will be in it each night. They will also list objectives and upcoming events in it. (If it is not signed they owe laps at recess, but it is their responsibility to show you each night.)

Specials-2nd Semester
