

## Mr. Allison's News

**Reading:** The class will continue working on a lot of vocabulary and comprehension skills. Please continue to read with them at home nightly. We will also be doing an opinion writing paper this month.

**Science:** Science will continue to focus on various STEAM activities. We are currently in the process of designing and building a catapult to launch a ping pong ball.

**Math:** We will be reviewing a number of topics from this year. Math assignments will look different from here on out since we finished the regular curriculum before State testing. Please keep reviewing basic facts at home in order to keep them fresh.
