April 2019

STEAM Lab

The students made straw rockets and then using the rocket launcher had to aim at the correct angle and use the correct pressure to land in the target (the trash can).

CURRICULUM

SCIENCE: Students are working with a partner to make a Rock Cycle poster. They must include specific words that pertain to the processes that occur during the rock cycle and report 3 facts on each of the 3 types of rocks.

Social Studies: We are just wrapping up a chapter on Ancient China. The students had to select a quote by Confucius and publish it in a Google Slide. They will be testing over the unit this week.

Math – In Math, we are reviewing our standards for State Assessments. We will have two more Wednesday quizzes for the year. They are scheduled for Wednesday, April 3rd, and Thursday, April 11th.

Language Arts - We are building background and analyzing examples of argumentative essays. Students will begin writing their own argumentative essays next week.

Bridge Challenge for Sphero

Students had to purchase supplies from a \$4000.00 budget and build the lightest and least expensive bridge that Sphero could cross covering a 12 inch span. Congrats to the winning team.
