Math

Our first math chapter is on place value, addition, and subtraction to one million. This chapter is spent working on modeling place value relationships, read and writing numbers, ordering numbers, rounding numbers, and adding and subtracting whole numbers. We will also do some problem solving with these concepts.

We are so excited to be using our STEAM Lab again this year! We get to visit the STEAM Lab every Tuesday. We have tried out the Dash robots and Ozobots so far!

Reading

We have recently started reading *My Brother Martin*. It is a biography about Martin Luther King, Jr. written by his sister. It tells of their childhood. We will work on author's purpose with this story. We also are working on different types of sentences. Declarative, interrogative, imperative, and exclamatory are the terms we are working on.
