

## Mr. Allison's News

**Math:** We will soon be working on multiplication. A solid understanding of addition and subtraction will be necessary in order to learn multiplication and division later in the year so please continue to review these skills. Also please keep reminding them about "attention to detail" during math and labeling their answers.

**Reading:** We will continue to focus on fluency, comprehension, and vocabulary. The biggest thing you can do at home is to have your child **read out loud nightly**. Reading out loud helps them develop fluency skills that we work on in class. Also, read to your child from time to time. this is a great way to model what fluency looks like.

**Science:** We are excited to have new curriculum. The first chapter is all about the engineering process and how to solve problems. This will be a great resource as your kids learn how to think outside of the box when finding new solutions.

**STEAM Lab:** The kids have been trying to build bridges out of straws. This has been a challenging process for them because they are limited on their supplies and it has to hold 50 pennies. We are learning a lot about learning from failure through this process.

### Specials: 1<sup>st</sup> Semester

**M/W/F** – Music

**T/Th.** – P.E.

**Wed.** – Library – bring books back

**3<sup>rd</sup> Grade Notes:** Make sure you are looking at your child's planner **each night**. Reading and math should have something written in them each night. This is a great place to write a note me.

### Upcoming:

10/9 – 1 Hour Late Start

10/18– End of 1st 9 weeks

10/21 – No School

10/23 – Class Pictures
