

### Math

We have been working on multiplication, especially focusing on two digit by two digit multiplication. We have also been practicing fact fluency on Math Facts Pro. The kids can even practice this at home with their login at [mathfactspro.com](http://mathfactspro.com). The teacher username is edna4. The student user name is their first name and last initial. Their passwords are what they use to login to the school computers with no 506 at the end.

### Reading

This week we are reading a story called *Jose! Born to Dance*. It tells about a young man's determination to become a professional dancer. It uses descriptive language and literary devices, such as simile and metaphor, to tell about a real person's life.

The bank is holding its annual Christmas ornament contest again this year. Your child may create an ornament at home out of any variety of materials. Make sure you place your child's name and grade somewhere on the ornament. These ornaments are due by December 2! This is voluntary, but the bank does donate \$2.00 to the library for every ornament entered in the contest. Thank you!

We will start our Fast Bridge mid-year assessments the last week of November into the first part of December. We will take a test for math and a test for language arts. This score will go on the graph I shared with you at our parent teacher conference earlier this fall. I will share the results at the next conference we have this spring.
