Check out Facebook for pictures of our state float projects and a video of our parade!

## Math

We have been working on perimeter and area formulas. Our goals are to be able to define perimeter, find perimeter of a shape, compare perimeter and area, and also model perimeter and area.

We have been celebrating Earth Day virtually with Farm Bureau this year. Instead of going to Parsons for informational sessions, they recorded sessions from local FFA branches for us to watch. We have learned about different types of machinery, tools, technology, natural resources, conservation, and farm products.

## End of the Year Field Trip!

The 3rd, 4th, and 5th grade classes will be traveling to 4th Street Bowl in Joplin, MO on Friday, May 6th. We will leave promptly once school begins, so please make sure your child is not late that day. We will return at the end of the normal school day.

After we are finished with bowling, we will go eat lunch at the food court at Northpark Mall. Any remaining time may be spent at the arcade in the mall or shopping if additional money is brought. The students will not be allowed to go anywhere without an adult while at the mall.

PTO has kindly agreed to pay for bowling. However, your child needs to bring money to eat lunch, or they may bring a sack lunch from home.

Parents are welcome to follow the bus or meet us at our destinations. Any additional guests will need to pay for their own bowling games/shoes as well as lunch.
