

2nd Grade News

January Events

- 16th-No school
- 30th-Celebrate KS Day

Reminders

-Students should read 20 minutes a night and do their reading log.

This month we will be learning about Kansas state symbols to help celebrate Kansas Day.

We are also learning about biographies and we will be doing research on famous Americans.

Science will get explosive this month as we begin looking at the layers of Earth and how it can change through volcanoes.

In math we will be learning to add and subtract within a thousand. This will be a challenge, but I know our class is ready! Any practice with flashcards at home will help them when working with multi-digit numbers.

Our class is also learning about jumping rope. With all this cold weather, we are going to the gym and practicing jumping with a double dutch jump rope during recess. We have already improved! Dale has our record with 32 jumps.
